Figure 1: A 3D visualization of the 1000 Genomes Project data. The plot shows the genetic distance between 1000 individuals from five populations: African (AFR), European (EUR), East Asian (EAS), South Asian (SAS), and Admixed American (AMR). The axes represent genetic distance, with a scale from 0 to 1000. The plot is divided into five regions, each corresponding to one of the populations. The regions are labeled with their respective population names and the number of individuals in each region. The plot shows that individuals from the same population are genetically closer to each other than to individuals from other populations. The plot also shows that individuals from the same population are genetically closer to each other than to individuals from other populations.

Population	Number of Individuals
African (AFR)	100
European (EUR)	100
East Asian (EAS)	100
South Asian (SAS)	100
Admixed American (AMR)	100
